## Skills

### Adaptability

**Embrace change** and keep on **learning**. I value the concepts, languages and tools I used so far but I value the team and business more. So I'm **open minded** about any opportunity.

### Creativity

**Team-wide standards**, **good practice** and a business story : there is **so much room left for creativity**. I love to express it from naming a variable to designing a multi microservices platform.

### Conceptual

You can't beat working code but it will be reasoned about, grow and someone[else] will build around. Therefore it's important that the **interface** is **future-proof** and the **business** needs are **clearly expressed** in code (**Domain Driven Design** is part of my toolbox).

### Team player

**Interaction** is the key : shaping and building together a solution, **exchanging** experiences, **sharing** knowledge and **debating**. Something I practiced too late and didn't do enough : pair programming.

## Projects

### Mail Platform

api first

microservice

cqrs

netcore

rabbitmq

servicestack

redis

The mail platform was set up to send external and internal emails. Based on a choreography of five new microservices, it provides email sending, email templating, webhook notification and reporting.

### Electoral GPS

open source

nodejs

vue

Electoral GPS for belgian municipal election in 2018.

## Languages

### English

Full professional proficiency

### Dutch

Professional working proficiency (writing, speaking) but passive bilingual

### French

Mother Tongue

## Timeline

Feb 2019

18 months

Volunteer work in Australia

@ Workaway

Mar 2016

< 3 years

Software Developer

@ RingRing

Dec 2014

One year

Volunteer work in New Zealand

@ WWOOF

Dec 2013

One year

Application Developer

@ CSC/INASTI

Feb 2013

Three months

.NET Developer

@ Bewan

Aug 2012

One month

Developer

@ PMG Luxembourg-Dinant

Sep 2011

Bachelor's Degree in Business Computing

@ Hénallux

Dec 2008

B.S. in Engineering (mechanics and electronics)

@ UCL graduated 1st year in 2009
