🚀 Driving licence

`4 years experience` `<> since 2008`

The digital world is pulling the strings. Committed to **good design** and **creativity**, can you branch nowadays issues? Let's merge our efforts and push something [really] **useful to the world**.

`c#` `go` `domain driven design` `agile` `nosql` `microservices` `event driven` `best principles`

Skills

Adaptability

Embrace change and keep on **learning**. I value the concepts, languages and tools I used so far but I value the team and business more. So I'm **open minded** about any opportunity.

Conceptual

You can't beat working code but it will be reasoned about, grow and someone[else] will build around. Therefore it's important that the **interface** is **future-proof** and the **business** needs are **cleary expressed** in code (**Domain Driven Design** is part of my toolbox).

Creativity

Team-wide standards, **good practice** and a business story : there is **so much room left for creativity**. I love to express it from naming a variable to designing a multi microservices platform.

Team player

Interaction is the key : shaping and building together a solution, **exchanging** experiences, **sharing** knowledge and **debating**. Something I praticed too late and didn't do enough : pair programming.

Projects

Mail Platform

`api first` `microservice` `cqrs` `netcore` `rabbitmq` `servicestack` `redis`

The mail platform was set up to send external and internal emails. Based on a choreography of five new microservices, it provides email sending, email templating, webhook notification and reporting.

Electoral GPS

`open source` `nodejs` `vue`

Electoral GPS for belgian municipal election in 2018.

Languages

English
Full professional proficiency

French
Mother Tongue

Dutch
Professional working proficiency (writing, speaking) but passive bilingual

Timeline

Date	Role
Feb 2019 `18 months`	**Volunteer work in Australia** @ *Workaway*
Mar 2016 `< 3 years`	**Software Developer** @ *RingRing*
Dec 2014 `One year`	**Volunteer work in New Zealand** @ *WWOOF*
Dec 2013 `One year`	**Application Developer** @ *CSC/INASTI*
Feb 2013 `Three months`	**.NET Developer** @ *Bewan*
Aug 2012 `One month`	**Developer** @ *PMG Luxembourg-Dinant*
Sep 2011	**Bachelor's Degree in Business Computing** @ *Hénallux*
Dec 2008	**B.S. in Engineering (mechanics and electronics)** @ *UCL* `graduated 1st year in 2009`
